

WAFIC

WESTERN AUSTRALIAN FISHING
INDUSTRY COUNCIL INC

INDUSTRY MEETING

WAFIC invites all commercial fishers and interested parties to attend an important meeting in Geraldton to discuss key issues facing the future of WA fisheries, particularly those in the MidWest region.

This will be a Sundowner format and includes presentations on a range of challenges - including the growing loss of access to commercial fishing and the resulting impacts on local communities and fresh WA seafood supply to local markets.

There will be ample opportunity for comments and to raise any questions in relation to the presentations.

Presentations include:

- The proposed Eureka seismic survey and other seismic proposals
- Windfarms and hydrogen hubs
- Worker shortages
- Marine Parks
- Compensation – the way ahead
- WA food supply and food security
- West Coast Demersal update
- The growing loss of access to commercial fishing and resultant impacts on local communities and fresh WA seafood supply to local markets

This meeting is an opportunity not to be missed.

WAFIC is ensuring it properly represents the interests of fishers, aquaculture developers and associated businesses by providing attendees with open access to a broad understanding of the issues, not just those pertaining to their own specific operations.

GERALDTON GUN CLUB

299 Eighth Street, Wonthella
